

OCRIS Data Logging Software

The **OCRIS** data entry system is specifically designed to facilitate accurate data logging and runs on any Windows-based computer, using a single SQL Server data base for both system configuration and data storage. With **OCRIS** we guarantee accuracy and efficiency in data collection.

Key Features

- ✓ Security of using SQL Server
- ✓ "On-the-Fly" validation
- ✓ Data Summary view
- ✓ Single File updates
- ✓ Data Model independent
- ✓ "On-the-Fly" calculations and derived fields/formulae
- ✓ Separate Admin product for configuration
- ✓ Intra-Table validation
- ✓ Row/Column defaults and auto-population of data
- ✓ Export Status tracking
- ✓ Single File Exports
- ✓ Multiple Logging Templates in one installation
- ✓ Specify Mandatory fields
- ✓ Predictive text in library drop downs

Depth From	Depth To	Exported Status	Sample ID	Sample Type	Sample Group	Standard ID
0.00	1.00	Y	A00001	CHIPS-RFSPT	ALPHA	
1.00	2.00	Y	A00002	CHIPS-RFSPT	ALPHA	
2.00	3.00	Y	A00003	CHIPS-RFSPT	ALPHA	
3.00	4.00	Y	A00004	CHIPS-RFSPT	ALPHA	
4.00	5.00	Y	A00005	CHIPS-RFSPT	ALPHA	
5.00	6.00	Y	A00006	CHIPS-RFSPT	ALPHA	
7.00	7.00	N	A00007	CHIPS-RFSPT	ALPHA	
7.00	8.00	N	A00008	CHIPS-RFSPT	ALPHA	
8.00	9.00	N	A00009	CHIPS-RFSPT	ALPHA	
9.00	10.00	N	A00010	CHIPS-RFSPT	ALPHA	

OCRIS can be configured to handle any exploration, drilling or environmental logging requirements.

OCRIS Benefits

- Suitable for all exploration methods
- OCRIS worksheets can be tailor-made for all individual worksite applications
- User defined parameters for repetitive data entry
- Simple to use, allowing you to add, validate and extract data all within a single, user-friendly interface
- can be developed and administered by your company's personnel or supported by Expedio's highly experienced geo-scientific technical consultants
- Incredibly cost-effective
- Rapid integration of field data into your corporate data base
- Data input instantly available for use in third party applications
- Auditable trail of data base changes
- Logging definitions are easily updated without data corruption
- Completely customisable, allowing for a selection of multiple interfaces to suit your different exploration methods
