

OCRIS from Expedio

Release V2.2.2.7 – July 2010

OCRIS Logger Enhancements

Added custom Validation feature (325/347)

Expedio branding introduced (331) *** If you are currently using a 'custom' logo in the file logoOcris.bmp, and you run the OCRIS Updater program, this file will be overwritten by the new Expedio logo. If you wish to retain your custom logo, you should make a copy of this file before updating, and then copy it back into the OCRIS folder after the update has been performed.*

Improved International locale handling (333)

Feedback functionality improved (335)

Enhance 'increment' functionality (339)

Alternate row colouring on Worksheet grid

OCRIS Logger Fixes

Main Panel, date field issues on 64-Bit systems (328)

Desktop shortcuts issues with vista (329)

Issues with Worksheet column order definition when creating DB from .obo (330)

Main Panel, nested dropdowns auto-complete issues (337)

Check for empty header table when purging data (338)
